### Georgia Institute of Technology - Atlanta, Georgia

August 2008-May 2009

- Took 11 classes as an exchange student concentrating on international business and foreign languages

## WORK EXPERIENCE

---

### General Electric - Seoul, Korea

January 2012-June 2012

*Corporate Tax, FMP (Financial Management Program, an entry-level corporate finance leadership track)*

- Led GE Ultrasound Korea's application of a ten year corporate tax exemption for manufacturing high technology equipment by finding legal ground and preparing a technology summary, a business forecast, an outcome analysis, and legal contracts
- Assisted developing a cost charging method for the top management team by reviewing their work responsibilities from a tax perspective and building a rationale for classifying the costs into stewardship costs and the rest which are allocated to Korean entities

### Misocredit Bank - New York, U.S.A.

July 2011-August 2011

*Microfinance Modeling Project, Team Leader*

- Initiated a consulting project for the purpose of finding a sustainable operation model that minimized the Korea Misocredit Bank's heavy reliance on government support
- Led interviews with 13 organizations, including investment banks, microfinance banks and business schools, to find specific investment models that enable the private sector to participate and the due diligence process to earn credibility from future investors
- Suggested three fundamental problems, proposed a surviving strategy to increase revenue with a fixed 4% interest rate, and gave recommendations to the client's positioning problems, which expected to double the borrower pool and enhancing self-sufficiency

### The Boston Consulting Group - Seoul, Korea

February 2011-June 2011

*Spring Intern*

- Worked on three projects within the finance, healthcare, and high-tech industries, widening the scope of work duties by utilizing excellent research abilities and using efficient writing skills
- Reorganized three major high-tech competitors' total product lineup and technology to help the client decide on the key product area they should be focused on, and identified potential acquisition candidate companies
- Prepared discussion materials through finding key overseas experts, wrote 20 in-depth summary notes, and summarized the FDA 501(c) process, which was used frequently in client workshops to learn about state-of-the-art medical technologies and the regulation process

### SK Foundation - London, U.K.

July 2010-August 2010

*Social Enterprise Consulting Project, Team Leader*

- Started a two month project to find the priority agenda of a newly established foundation to successfully incubate start-up social enterprises; conducted interviews with 7 entrepreneurs, 6 NGOs and the British government, focusing on the revenue model and incentives to participants to assist the ecosystem
- Introduced actionable items (Champion model, Changemakers, and Social Innovation Camp) and the first draft of website to the head of SK Foundation; received very promising reviews and was invited to be a judge of SK Foundation's awardee selection process

## EXTRACURRICULAR ACTIVITIES

---

### Global Enterprise Field Study - Shanghai & Beijing, China

February 2011

*Team Leader of the "Distribution Industry Team" sponsored by Yonsei University*

- Visited 10 global companies to investigate how Korean companies leverage their strength in adjacent giant market; compiled a research paper addressing E-mart's core challenges in Shanghai and created it into a guidebook for potential market entrants

### Asia Business Forum - Tokyo, Japan

August 2010

*Korean Participant of the forum and the member of the 1<sup>st</sup> prize winning team*

- Participated in a business competition with Keio Students analyzing and setting the short-term strategy of a Korean business item and Japanese competitors; Received the 1<sup>st</sup> prize and published the outcome in Yonsei Business Newspaper
